

MASI gains

The Malawi All Share Index (MASI) gained by 0.96% to close the week at 22731.98 points on account of share price increases in NBS and TNM. Total value traded decreased by 57.20% to K34.08m from K79.62m recorded the previous week. A total of 2,462,103 shares were traded during the week compared to 4,572,748 shares transacted the previous week. Year to date return on the MASI stands at 5.25% (2017: 1.94%) (Source: MSE).

Corporate update

NBS announced the appointment of Mrs. Vera Zulu as Chief Finance Officer of the bank. Mrs. Zulu is a qualified accountant with 18 years' experience. She holds an MBA from University of Derby, a Bachelor of Accountancy degree from UNIMA and is a Fellow of the Association of Chartered Accountants (FCCA) and a Certified Public Accountant (CPA) with ICAM. Prior to joining NBS, Mrs. Zulu was CFO for Nedbank.

Kwacha exchange rate movements

During the week, the Kwacha depreciated against most major currencies. Gross official reserves increased to USD715.02m (3.42 months of imports) as at 14th February 2018 from USD709.17m (3.39 months of imports) recorded on 9th February 2018 (Source: RBM). We expect the Kwacha to remain broadly stable against the USD in the short to medium term backed by sufficient foreign reserves and declining demand in agricultural inputs imports. The Kwacha may, however, continue to depreciate against other major currencies.

Government securities

At the TB auction held on 14th February 2018, K7.31b was raised. The average yield marginally increased to 14.50% from 14.47% the previous week. The auction registered a rejection of 0.92% (Source: RBM). Looking forward, we expect the steady state of Treasury Bill yields to continue in the short term. In the medium term, government securities could face a downward pressure as the authorities look for cheaper funds.

The Government of Malawi, through the Reserve Bank, has issued a K3.00b 3-year Treasury note with a fixed coupon of 11.00% per annum payable semi-annually. Auctions will be conducted monthly or as otherwise prescribed by the Government until the note is fully subscribed. Initial auction is on 20th February 2018. The bond will be listed on the Malawi Stock Exchange and secondary trading is to commence a week after each auction (Source: GoM).

Interbank market

Liquidity increased to a daily average of K7.69b from K1.80b the previous week. The average overnight interbank rate, consequently, decreased to 15.81% from 16.32% the preceding week. The daily average volume traded on the interbank market increased to K7.08b from K5.57b the previous week. Access to the Lombard Facility decreased to K1.30b from K64.49b. RBM mopped up K24.94b from the system through OMOS (Source: RBM). We expect liquidity conditions to be subdued in the short to medium term as the authorities intensify mop up operations to keep inflation on the declining trend.
