

### MASI gains

The Malawi All Share Index (MASI) gained by 1.41% to close the week at 27092.17 points due to share price increases in PCL, OML, STANDARD and SUNBIRD. Total value traded decreased by 28.58% to K259.11m from K362.81m recorded the previous week. A total of 1,871,987 shares were traded during the week compared to 8,002,154 shares that switched hands the previous week. Year to date return on the MASI stands at 25.44% (2017: 13.94%). There was no trade on the listed government securities during the week (Source: MSE).

### Kwacha exchange rate movements

The Kwacha appreciated against GBP, EUR and ZAR during the week but marginally depreciated against USD. Gross official reserves slightly increased to USD639.69m (3.06 months of imports) as at 25<sup>th</sup> April 2018 from USD636.9m (3.05 months of imports) recorded on 20<sup>th</sup> April 2018 (Source: RBM). We expect the Kwacha to maintain ground in the medium term backed by an improvement in foreign exchange reserves during the Tobacco marketing season.

### Treasury Bills

The Malawi Government raised a total of K5.96b through Treasury Bill auctions during the week, compared to K14.28b raised during the previous week. The average yield was steady at 14.50%. The auctions registered no rejection (Source: RBM). Looking forward, Treasury bill yields could remain steady for some time amid uncertainties regarding inflation. If inflation remains relatively low in the medium term, the yields could decline as the authorities target cheaper funds.

### Interbank market

Liquidity decreased during the week to a daily average of K6.24b from K15.88b the previous week. Consequently, the average overnight interbank rate marginally increased to 14.02% from 13.99%. The daily average volume traded on the interbank market increased to K9.33b from K3.99b the previous week. A total of K15.74b was accessed on the Lombard Facility during the week at a rate of 18.00%, compared to K5.02b during the previous week at the same rate. No mop-up open market operations (OMO) were conducted by RBM. (Source: RBM). We expect increased upward liquidity pressures during the agricultural marketing season and the RBM to intensify mop up operations during the period in order to reduce unfavorable effects of liquidity on inflation.
